

1. # in this dataset we observed that store\_and\_fwd\_flag has one the most missing values coulmes, so we drop that colume
2. ## in 'Airport\_fee' we observed that \$1.25 for pick up only at LaGuardia and John F. Kennedy Airports. so we extrack those values only.  
## before that we will transfrom '1.75' value in 2 and '-1.75' in 1
3. ## in this Ratecode id colume we replace the nan values by 'zeros'
4. then we perfrom some basic eda steps on that.
